Expertise

- Python
- Django
- MySQL
- Linux
- Git
- Analytical thinking skills
- Teamwork skills
- Problem solving skills

Language

- English
- Polish
- Ukranian

Experience

Online-course "Interactive SQL Simulator"

MySQL

After taking the course I learned how to:

- Create relational databases;
- Learn different types of SQL queries;
- Formulate, create, and debug SQL queries.

Online-course "Python Generation"

Python

In the course I studied the basic knowledge of the python programming language, such as :

- Data input/output;
- Conditional statement;
- Data Types;
- The for and while loops;
- String data type;
- Lists;
- Functions;

Online-course "Python Generation 2.0"

Python

In the course I studied such topics such as:

- Nested lists, matrices;
- Tuples, sets, dictionaries;
- Modules random, string, decimal, fractions and complex;
- Working with graphics, turtle module;
- Functions;
- File operations;

Project "Graph Coloring"

Python

Solves the problem of graph coloring using the Python programming language. During this project I learned how to work in a team and apply theoretical knowledge in practice.

Education

2020 - ...
Poznan, Poland

Poznan University of Technology
current

I study programming at university, such as programming languages, databases, operating systems, and other things related to computer science.
